

HHI Career Runtime Portfolio

Purpose

This repository functions as a longitudinal portfolio demonstrating operational AI governance research, governance documentation, runtime oversight concepts, systems analysis, evidence continuity, and AI-human governance workflow development.

It reflects: - professional transition progression - governance infrastructure development - operational systems thinking - public challenge participation - runtime governance experimentation - governance documentation capability - audit and evidence discipline - AI-assisted workflow provenance

Core Areas

AI Governance Operations

Operational governance documentation, oversight structures, governance workflows, escalation logic, and runtime governance framing.

Governance Documentation

AI usage policies, governance process mapping, standards crosswalk organization, operational workflow documentation, and audit preparation structures.

Runtime Oversight Concepts

Governance telemetry, Decision Boundaries, Stop Authority, escalation pathways, longitudinal accountability, and runtime observability.

Systems & Process Analysis

Infrastructure cohesion, governance survivability, interoperability mapping, deployment continuity, and behavioral risk visibility.

Evidence Categories

- Runtime telemetry examples
- Governance API outputs
- Deployment evidence
- Challenge submissions
- GitHub release continuity
- Governance audit artifacts
- AI collaboration/refinement traces
- Longitudinal progression logs

Flagship Repositories

- Hollow_House_Standards_Library
- HHI_GOV_01
- HHI_Runtime_Proof

- HHI_Privacy_Operations
- HHI_CPRA_Readiness_Acceleration_Suite

Public Authority References

GitHub: <https://github.com/hhidatasettechs-oss> LinkedIn: <https://www.linkedin.com/in/hollow-house-institute-3ab5a2182> DOI: <https://doi.org/10.5281/zenodo.20044740> ORCID: <https://orcid.org/0009-0009-4806-1949>

Core Principle

Time turns behavior into infrastructure. Behavior is the most honest data there is.

Services

- AI Governance Documentation
- AI Workflow SOP Development
- Governance Process Mapping
- AI Usage Policy Creation
- Audit Readiness Documentation
- Operational Governance Reviews

Selected Challenge Work

DEV Community Challenges

- Governance Before Agents: A Structured Human Intelligence Portfolio for AI Systems
- Turning Local AI Governance Into Runtime Infrastructure
- Building Runtime Governance for Local AI with Gemma

Evidence Highlights

- Runtime governance telemetry
- Governance API outputs
- Deployment continuity evidence
- Governance audit artifacts
- AI collaboration/refinement traces
- GitHub release continuity
- DOI-backed publication continuity
